

Why should anyone commission an architect, when they could simply enlist the help of a competent builder?

Architects consider space like no other professional; they understand the needs of clients and translate dreams into reality in unique and carefully crafted ways; they avoid knee-jerk responses and do what is appropriate for the client and the context of the development.

Any building project is about more than just bricks and mortar. It is much more holistic and thoughtful than that – and that's where architects come in.

Clients of Chartered Practices can expect a high quality service from professionals working to a common set of standards including:

- Professional indemnity insurance appropriate for the work undertaken.
- Quality management system in operation.
- Health and safety policy in operation.
- Employment policy which addresses the principles of the RIBA policy statement.
- Continuing professional development for all staff.
