Energy Conservation in Historic Buildings

Tuesday, 24 November 2009

Shaw House, Newbury

Climate change is already affecting most people's lives and for many thousands it is rapidly becoming a matter of life and death.

What we do now is the key to how soon and for how many the consequences will be that serious. The carbon footprint of buildings is amongst the more important things that need to change, and existing buildings account for some 80% of the built environment. So, as Conservation Architects, we have a crucial role to play.

It is hard to think of abandoning the principles and experience we have acquired with such dedication. But we do not have to abandon them. This year's conservation conference speakers are leaders in the art of combining historic building conservation with energy conservation, and are all eager to pass on their knowledge.

Join us on 24 November and go away at the end of the day able to maintain your principles while playing your part in the most important campaign in human history.

Who should attend?

Planners, Conservation Architects and Architects who have an interest in conservation and sustainability.

This conference qualifies for 6.5 hours CPD.

RIBA members are required to complete 35 hours of CPD per year. 19.5 hours should come from the Core Curriculum. Within this, it is compulsory to study 2 hours in health and safety matters.

RIBA South Conservation Awards Ceremony

The RIBA South Conservation Award winner(s) will be announced in a ceremony at Shaw House after the conference. **Please note that delegates wishing to attend the evening event must make a separate booking for the Awards Ceremony.** If you would like to be sent a booking form for the Awards Ceremony, please tick the box on the booking form on the back of this flyer.

Conference Programme

- | | |
|-----------|---|
| 9.00am | Registration with tea & coffee |
| 9.30am | Welcome and Introduction from Chair
<i>Michael Carden MBE, Member, RIBA South Conservation Group</i> |
| 9.55am | Reducing Carbon Emissions from Traditional Buildings – An Overview
<i>Peter Warm, Chartered Energy Conservation Engineer, WARM: Low Energy Building Practice</i> |
| 10.25am | Assessing the Performance of Historic Buildings
<i>Richard Oxley, Oxley Conservation</i> |
| 10.55am | Improving Energy Performance without Harming the Building's Character
<i>Jonathan Clarke MSc IHBC Dip HI MRAC, Director, Energy Solutions (Thame) Ltd</i> |
| 11.25am | Q & A |
| 11.45am | Tea & coffee break |
| 12.00noon | Insulation & Airtightness
<i>Richard Oxley, Oxley Conservation</i> |
| 12.45pm | Reducing Heat Loss Through Traditional Windows
<i>Dr Paul Baker, Research Fellow, School of Built & Natural Environment, Glasgow Caledonian University</i> |
| 1.20pm | Q & A |
| 1.40pm | Lunch |
| 2.30pm | Spital Square, London (Case Study)
