

The Demands Placed upon Coatings in this Modern World

Specification and the need for a single source solution to coatings

11 November 2009 – Armada House Conference Centre, Bristol, 2.00 - 5.00pm

Jotun Paints has come a long way since 1926 when setting up shop in Norway. The business is now a global market leader and encompasses **marine and protective coatings, decorative paints and powder coatings**. It comprises 71 companies, 40 production facilities across all continents and agents and distributors in more than 70 countries with over 7,000 employees and a turnover in excess of £1bn.

This seminar will illustrate how in these demanding times, a **single source solution to coating** using all the modern disciplines of the coatings world can make for a more professional, more complete system. Experience shows this approach is better for the client, better for the architect and the world we live in.

Jotun accepts and realises that the value in the pursuit of excellence is not about the destination, but the journey. In the meantime Jotun remain committed to these ideals. Architects and engineers have the relentless task of **sourcing high quality, cost effective decorative and sustainable coatings** that need to **withstand extreme levels of UV light, humidity, corrosion, high and low temperature and other environmental pollutants to preserve their strength and appearance**. Highly skilled R&D engineers in Norway team up with centres of excellence and laboratories around the world to speed the development of new high quality coating systems.

Speakers: **Richard Browne** has over 15 years technical experience within the demanding coatings market. He has worked in the high specification world of the City of London for both Sikksens and Jotun and with all the leading practices. Richard also covered the UK during 2007/8, presenting Colour Workshops for Architects and Interior Design practices, in particular three seminars at the Cube in Manchester which attracted audiences of over 150 per session.

Peter Jones has some fifteen years experience with Jotun, originally starting in Marine Technical Sales. He is a fully qualified FROSIO Inspector and, in addition to his marine background, has vast experience of both the Protective Coatings and Decorative markets. Peter currently works in three divisions of the Jotun business, offering Technical support and advice.

CPD record: 3 hours of formal CPD

CPD: **Construction Skills:** Specification Writing/Technical Innovations

Fees (including VAT at 15%):

Please book by 31 October 2009

£11.50 (Inc £1 ABS donation for RIBA Members)

Please reserve place(s) at £11.50 per place for the above seminar
