

Building Information Modelling (BIM)

Thursday 5th March 2009

Building Information Modelling (BIM) software is gaining rapid acceptance and adoption within the construction industry and has important implications for the architectural profession.

This half-day event will help to explain what BIM is all about, the real business benefits that it offers architectural practices, and the key issues involved in implementing a BIM solution within your design office.

Programme

- What is Building Information Modelling?
- Industry Trends Driving Adoption of BIM
- The Key Features and Benefits of a BIM Solution
- Live Demonstrations
 - Autodesk Revit Architecture
 - Autodesk Ecotect
- Implementing BIM in the Design Office
- Customer Case Studies
- Group Discussion, Q&A

This seminar will enable you to understand what BIM means and how BIM software can benefit your business by enabling you to:

- improve internal efficiencies and productivity
- deliver new services to existing clients, and
- win new projects by offering that something extra

Find out how BIM solutions can help your business respond to the current economic climate and to better exploit those opportunities that continue to exist.
