RIBA

RIBA Cambridge CPD Roadshow

Date: **16 May 2019**
Time: **9:30am – 4:00pm**
Venue: **Hallmark Hotel Cambridge, Bar Hill, Cambridge, CB23 8EU**

A full day of CPD and networking with fellow professionals

RIBA CPD Providers Network and RIBA East invite you to a full day's CPD. A unique opportunity for architects, and construction and design professionals to learn from members of the RIBA CPD Providers Network. You'll hear CPD Providers deliver RIBA-approved CPD and share their knowledge and expertise on a range of innovative products and the latest technologies.

– Attendance is free
– Wide range of topic areas
– Book up to five one-hour sessions
– Networking opportunities with fellow professionals
– RIBA-approved CPD presentations*
– All CPD seminars are delivered by RIBA CPD Providers Network** members
– Lunch and refreshments provided

Select a numbered seminar from each timeslot session and **book online at: architecture.com/cpdroadshows**

*All sessions are accredited under the RIBA CPD Core Curriculum in: Architecture for social purpose; Health, safety and wellbeing; Business, clients and services; Legal, regulatory and statutory compliance; Procurement and contracts; Sustainable architecture; Inclusive environments; Places, planning and communities; Conservation and heritage; Design, construction and technology.

**The RIBA CPD Providers Network is an industry force of over 500 companies and advisory organisations that provide RIBA-approved CPD to architects and other construction professionals.

'Very informative sessions with high quality speakers in an attractive venue and RIBA's high attention to detail make the event successful.'
Dinka Izetbegovic, delegate, London Roadshow January 2018

'This is an easy and enjoyable way for a sole practitioner or a small practice to keep up to date with new products and materials.'
John Melvin, delegate, Oxford Roadshow March 2018

RIBA Cambridge CPD Roadshow: Timetable

	9:30 - 10:30 session	10:45 - 11:45 session	12:00 - 13:00 session	13:45 - 14:45 session	15:00 - 16:00 session
Seminar 1	**Achieving Acoustical excellence with suspended ceilings** **Sto Ltd** Acoustical ceiling boards and panel systems aims to advise architects and others that there are alternatives to providing balanced acoustics without having to resort to modular ceilings. Whether the terminology is “seamless” “jointless” or “monolithic” these terms all relate to current thinking when looking at internal linings on building design, without compromising acoustics.	**Innovative Brick Match Solutions: A Practical Guide to Achieving the Best Brick Match** **Imperial Bricks** This seminar will help you to gain an improved understanding of brick matching techniques. It will help you to understand the following topics: • Understand how to recognise brick types, properties and characteristics and their application to aid the brick matching specification process • Understand remedies for matching weathered and aged brickwork • Understand brick blending • Understand economical colour correction • Understand considerations for additional brickwork aesthetics • Understand the use of brick slips for interiors and external facades	**Part L1A 2013: Fabric Performance and Towards Passive/NZEB Targets** **Xtratherm UK Ltd** This seminar focuses on the Building Regulations Part L1A 2013, fabric performance specification and the corresponding insulation specification for each of the fabric components. It will help you to understand the following topics: • Understand the latest version of the Building Regulations Part L1A 2013 and fabric performance specification • Understand target U-values and the reference house • Understand thermal bridging and how to achieve good fabric performance • Understand the y-value calculation • Understand airtightness targets	**External Tiling Solutions for Balconies and Terraces** **Building Adhesives Ltd** This seminar introduces the benefits of external living spaces in modern buildings and focuses on tiling as a solution for balconies and terraces. It will help you to understand the following topics: • Understand the value of external living areas in modern buildings and of using tiles in these areas • Understand the correct specification of tiles to avoid potential problems • Understand the different assemblies available and their comparative advantages and disadvantages • Understand what system design considerations are required • Understand factors for the integration of the area with the surrounding build, perimeters and safe and comfortable transitions	**Introduction to Sliding and Folding Door Gear** **Coburn Sliding Systems Ltd** This presentation provides information that architects and designers need to know when specifying sliding and folding door gear to create flexible and versatile space solutions. It will help you to understand the following topics: • Understand what sliding and folding door gear is, where it can be used and why you would use it • Understand the various system types available and how and when to use them • Understand how to specify the correct system based on clients requirements
Seminar 2	**Advantages of Pressed Profile Aluminium Radiators** **Vasco Group nv** This seminar is about the benefits of using aluminium for the construction of radiators and the use of extruded pressed profile aluminium radiators. It will help you to understand the following topics: • Understand the use of aluminium radiators • Understand how radiators function to heat a space • Understand the advantages of aluminium radiators and the benefit to the environment of using recycled aluminium in radiator construction • Understand the advantages for architects of using pressed profile aluminium radiators over other types of radiators	**How to Light Grade Listed Buildings** **John Cullen Lighting** The CPD covers the following: • Variables in lighting listed buildings • Working with the fabric of the building/ understanding limitations and possibilities • Thinking outside the box to enhance architectural features • Selection of appropriate luminaries and bespoke options • Review of traditional concepts with modern fittings to maintain the historical value across a variety of our projects	**GRP Roofing Systems and How They Differ** **Hambleside Danelaw Ltd** This seminar will: • Provide an introduction to GRP as a construction material • Place GRP on a historical, environmental and architectural context • Consider different construction and installation methods using GRP • Show examples of projects using the material	**Contemporary Rooflight Solutions: A Specifier’s Guide to Flat Glass Rooflights** **Roofglaze Ltd** This seminar will outline: • Contemporary daylighting systems and the growing demand for flat glass rooflights • The leading-edge glass solutions in today’s marketplace • What you need to consider when specifying flat glass rooflights • The relevant British Standards and testing procedures • How to install and maintain these rooflights	**Aluminium Rainwater, Fascia and Soffit Systems (Durable Eaves Solutions)** **Alutec** • Alutec’s CPD gives an insight into aluminium rainwater and fascia and soffit systems: • Overview of environmental aspects, benefits and properties of aluminium • Correct system design and cost considerations • Brief overview of Alutec product ranges • Available technical and installation support
