RIBA London CPD Roadshow

A full day of CPD and networking with fellow professionals

RIBA CPD Providers Network and RIBA London invite you to a full day's CPD. A unique opportunity for architects, and construction and design professionals to learn from members of the RIBA CPD Providers Network. You'll hear CPD Providers deliver RIBA-approved CPD, and share their knowledge and expertise on a range of innovative products and the latest technologies.

- Attendance is free
- Wide range of topic areas
- Book up to five one-hour sessions
- Networking opportunities with fellow professionals

RIBA London CPD Roadshow

Date: 26 April 2018
Time: 9:30am – 4:00pm
Venue: etc. Venues, Bishopsgate Court, 4-12 Norton Folgate E1 6DQ

‘Essential to attend to keep up with CPD obligations. Guaranteed to learn something new.’
Philip McLean, delegate, Glasgow Roadshow May 2017

Select a numbered seminar from each timeslot session and book online at: ribacpd.com/cpdroadshow

*All sessions are accredited under the RIBA CPD Core Curriculum in: Architecture for social purpose; Health, safety and wellbeing; Business, clients and services; Legal, regulatory and statutory compliance; Procurement and contracts; Sustainable architecture; Inclusive environments; Places, planning and communities; Conservation and heritage; Design, construction and technology.

**The RIBA CPD Providers Network is an industry force of over 500 companies and advisory organisations that provide RIBA-approved CPD to architects and other construction professionals.

Seminar 1
Avoiding Common Failures When Specifying Wall and Floor Tiling
Norcros Adhesives, trading division of Norcros Group (Holdings)

Seminar 2
Rubber Floor Coverings – A Material with Fascinating Properties
nora Flooring Systems UK Ltd

Seminar 3
Go Underground and Give Wine a Home of Its Own
Spiral Ceilings Ltd

Seminar 4
Guide to the Design of Structural Waterproofing for Basements
Premcrete

Seminar 5
Natural Stone: Types, Finishes and Applications
Lundhs AS

9:30 - 10:30 session

10:45 - 11:45 session

12:00 - 13:00 session

13:45 - 14:45 session

15:00 - 16:00 session

Avoiding Common Failures When Specifying Wall and Floor Tiling
Norcros Adhesives, trading division of Norcros Group (Holdings)

Revolutionising Restoration
Imperial Bricks

Introduction to Raised Access Floors
Kingspan Access Floors Ltd

Structural Waterproofing Design Strategies to BS 8102:2009
Newton Waterproofing Systems Ltd

Glass and Light Solutions: Interior and Exterior Perspective
SCHOTT UK Ltd

Specifying the Correct Door
Hörmann (UK) Ltd

Part L1A 2013: Fabric Performance and Towards Passive/ NZEB Targets
Xtratherm UK Ltd

Glass Tubes and Profiles – Architecture, Art and Design
Schott UK Ltd

Eurocell

Platform Lifts: Who Needs Them?
Gartec Ltd

Step on It: Stairway Safety
Quantum Flooring Solutions, a trading name of Quantum Profile Systems Ltd

Five Key Steps to Successful Washroom Specification
Amwell Systems Ltd

Demystifying Ironmongery
ASSA ABLOY UK

Solar Shading: Solar Heat Gain and Compliance with Building Regs Part L
Dales Fabrications Ltd – Aluminium Eaves Products

Soundproofing Solutions
Cellecta Ltd

The Route to Concrete Repair
Mapei (UK) Ltd

Open BIM
Graphisoft UK Ltd

Making Good: Concrete Repairs in Accordance with BS EN 1504
Fosroc Ltd

To Be or Not to OSB? Applications and Benefits of Oriented Strand Board
Norbord Europe Ltd

When Two Worlds Meet: An Introduction to Media Installations
Osram

External Tiling Solutions for Balconies and Terraces
Building Adhesives Ltd

Full seminar details overleaf
1. Avoiding Common Failures When Specifying Wall and Floor Tiling: Norcros Adhesives, trading division of Norcros Group (Holdings) Ltd
   - This seminar identifies and explains how the various common tiling backgounds may cause failure, and provides solutions to avoid installation failure.
   - Tiling over wood based substrates.
   - Tiling over screeds.
   - Best practice floor tiling installation.
   - Tiling over plasterboard.
   - Tiling over plywood.

2. Rubber Floor Coverings – A Material with Fascinating Properties: nora Flooring Systems UK Ltd
   - Our modern and user-friendly iPad-based, interactive seminar has even more enhanced HD project references and videos. The seminar looks at the technical and aesthetic aspects of specifying resilient floor coverings, the properties of rubber and the quite unique design impact that can be made on any interior. This seminar is worth double points.

3. Go Underground and Give Wine a Home of Its Own: Spiral Cellars Ltd
   - Go underground and give your wine a home of its own is designed to give the audience a thorough understanding of the need for wine storage, how to store wine correctly and the benefits of underground wine storage, with two unique background on the components and processes involved in constructing a prefabricated natural wine cellar. The audience will come away from this seminar with the knowledge to advise their residential and hospitality clients on how best to store their wine collection.

   - This seminar gives the information required to enable modern, responsible structural waterproofing design for basements.
   - How to correctly design structural waterproofing systems in accordance with BS 8102:2009.
   - The different types of waterproofing available and how they should be used.
   - The importance of using combined waterproofing barriers.
   - The importance of proper quality control and new ways to improve quality control using technology.
   - Good and bad features within design and installation of waterproofing.

5. Natural Stone: Types, Finishes and Applications: Lundhs AS
   - This seminar covers a wide range of natural stone, including limestone, travertine, onyx, marble, serpentine, sandstone, slate, quartzite and granite. It will help you to understand the following topics:
   - The various types of natural stone available and their properties.
   - Common quarrying techniques and production processes.

6. 1. Revolutionising Restoration: Imperial Bricks
   - This seminar looks at how to choose the right brick for renovation, extension and new build.
   - The history of brick making in the UK and the range of brickwork bonds used.
   - Regional variations in brick size, colour and texture.
   - The production process for handmade bricks.

7. 2. Introduction to Raised Access Floors: Kingspan Access Floors Ltd
   - A history of raised access floors.
   - What is a raised access floor system?
   - Features/benefits of raised access floors.
   - Applications and finishes.
   - Installation.
   - Specification guidance.
   - System selection and criteria.

   - This seminar focuses on the different forms of structural waterproofing systems on the market and how to achieve to achieve the environment grade required within BS 8102:2009. There is a focus on new build (concrete) structures and how combination waterproofing systems are specified for below-ground environments. There will be detailed discussion of how different waterproofing designs interface with below-ground structures.

   - Looking at the specification of windows, specifically PVC-U windows.
   - How the windows market has changed over the years – looking at past, present and future window specifications and requirements.
   - How PVC windows are appropriate in specialist applications in zero carbon developments, etc.
   - Future developments within the window industry and how companies are future-proofing their systems.

    - This interactive seminar offers architects an in-depth working knowledge of lifting platforms and how to specify them. It aims to deliver sufficient information to enable the audience to understand the following topics:
    - What a lifting platform is.
    - How to comply with Building Regulations and standards, and spot difficulties with non-compliant lifts.
    - Common applications for platform lifts and how to advise clients on their use.

11. 6. What stair nosings are designed to achieve and how to select the right one.
    - How recent BRE and Equality Act guidelines affect the choices for specifies.
    - The unique Quantum step measuring system QSMS – which speeds up handover processes.
    - Environmental and Health & Safety considerations applicable to the manufacture, installation and maintenance of stair nosings.

12. 7. Five Key Steps to Successful Washroom Specification: Amwell Systems Ltd
    - Introduction to washroom material options.
    - Cubicle fixtures and fittings.
    - Other washroom elements: vanity units and duct panelling/ framing.
    - Overall washroom regulations.
    - Advice on budget.

13. 8. Demystifying Ironmongery: ASSA ABLOY UK
    - This seminar provides guidance on specifying the right ironmongery on different types of doors:
      - Gain an understanding of how to specify architectural ironmongery.
      - Develop an insight into the terminology and phrases used when specifying architectural ironmongery.
      - Obtain an insight into the standards and regulations that affect architectural ironmongery.

    - This seminar looks at the way solar shading relates to the current Building Regulations (Non-Domestic). It will help you to understand the following topics:
      - Solar heat gain calculations.
      - How solar shading can affect solar heat gain to reduce building energy costs.
      - How solar shading can be used to comply with Building Regulations.

15. 10. Soundproofing Solutions: Cellecta Ltd
    - A look at the range of resilient systems.
    - The principles of concrete repair and choosing the correct repair materials and application.
    - The importance of looking at changes in building materials and how processes might need to change to take full advantage of BIM.
    - The importance of considering how processes might need to change to take full advantage of BIM.
    - Understanding the importance of looking at changes in workflows that will be necessary if BIM is adopted.
    - Start considering the importance of establishing clear protocols at the outset of a project.
    - Understand the issues surrounding PI and contracts.

16. 11. Open BIM: Graphisoft UK Ltd
    - Gain a broad understanding of BIM.
    - Gain an understanding of how processes might need to change to take full advantage of BIM.
    - Understand the importance of looking at changes in workflows that will be necessary if BIM is adopted.
    - Start considering the importance of establishing clear protocols at the outset of a project.
    - Understand the issues surrounding PI and contracts.

17. 12. Making Good: Concrete Repairs in Accordance with BS EN 1504: Fosroc Ltd
    - This seminar looks at concrete repair and how to choose the right solution in accordance with BS EN 1504. It will help you to understand:
      - The principles of concrete repair and choosing the right systems for rehabilitation.
      - The steps in assessment, specification, repair and maintenance of concrete.
      - Key factors to consider when specifying a concrete repair.
      - How to choose correct repair materials and application methods.
      - How to identify possible installation failures and how best to avoid them.

18. 13. To Be or Not to OSB?: Applications and Benefits of Oriented Strand Board: Norbord Europe Ltd
    - Other washroom elements: vanity units and duct panelling/ framing.

    - Other washroom elements: vanity units and duct panelling/ framing.

20. 15. 5. The Route to Concrete Repair: Mapei (UK) Ltd
    - Other washroom elements: vanity units and duct panelling/ framing.

21. 6. Externe Tiling Solutions for Balconies and Terraces: Building Adhesives Ltd
    - The value of external living areas in modern buildings and how to use these areas in these areas.
    - The correct specification of tiles to avoid potential problems.
    - The different materials available and their comparative advantages and disadvantages.
    - What system design considerations are required.
    - Factors for the integration of this area with the surrounding build; safe and comfortable transitions.
